

THE JUSTICE FOR FALLUJAH PROJECT

مشروع العدالة من اجل الفلوجة

We are a group of veterans, students, and working people dedicated to raising awareness about the suffering of the people of Fallujah, promoting solidarity with the victims of US war crimes, and ultimately ending all US wars and occupations.

Since the two US-led sieges of Fallujah that destroyed the city in 2004, the people of Fallujah have suffered a dramatic increase in cancers, birth defects, and infant mortality. This health crisis is said to be worse than a similar health crisis in the cities of Hiroshima and Nagasaki after the atomic bombs.

Recent studies conclude that the most likely cause of the high rates of cancers, birth defects, and infant mortality in Fallujah is uranium weapons used by the US in 2004.

Hair samples taken from the mothers of children with birth defects have shown high levels of exposure to Enriched uranium as far back as 2005.

Fallujah is to the Occupation of Iraq what My Lai was to the Vietnam War, and what Hiroshima and Nagasaki were to World War II. Help us fight for justice for Fallujah.
